## Introduction

AppJetty provides effective solution in the form of Delivery Date Scheduler which is helpful for entrepreneurs to easily deal with order management process. It is an ideal extension for customers which allow selecting date on which they want to receive delivery of product. Admin can disable week off days and time slot which won't allow customers to choose those days and time for delivery.

## Benefits of Delivery Date Scheduler

- Makes it convenient to manage delivery schedules
- Effectively displays the delivery date with order information
- Enables admin to consolidate order management processes
- Create seamless shipping experience for customers
- Save a lot of time and money for delivery

# Installation & Activation

## Installation Steps

### Step 1: Check Permissions

- Make sure the "app", "skin" and "lib" directories of your Magento and all directories inside it have full written permissions or set permissions on each directory equal to 777 or 0777.

**Important! Change all permissions back after installation.**

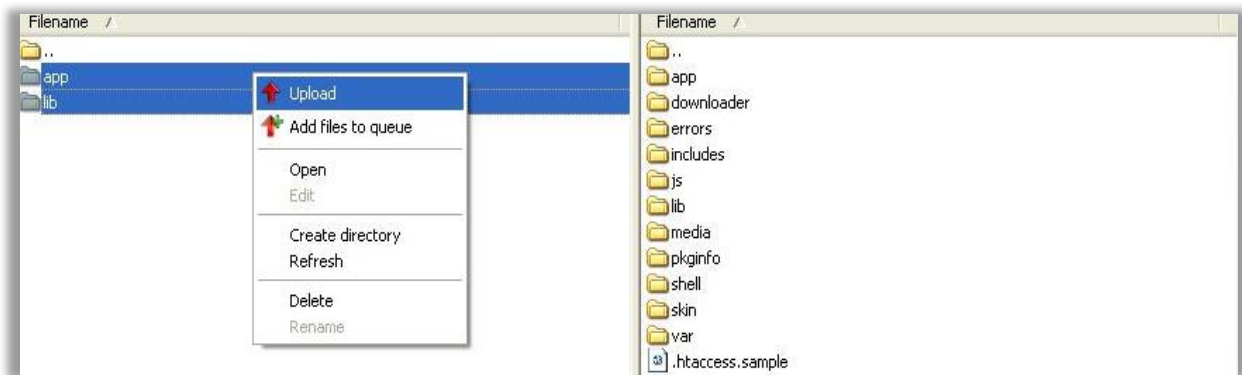

Read more about permission at [www.magentoocommerce.com/wiki/magentofilesystempermissions](http://www.magentoocommerce.com/wiki/magentofilesystempermissions)

### Step 2: Disable Compilation

- Log into Magento Admin Panel and go to **System** → **Tools** → **Compilation** and disable the compilation.
- After Step 5, you can run the compilation process again.

### Step 3: Upload Files

- Upload all folders from the extension package to the installation directory of your Magento software using an FTP client.

### Step 4: Clear cache

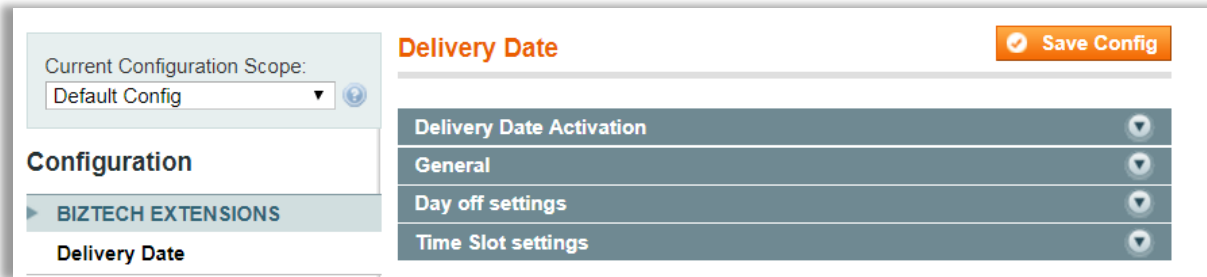

- Go to **System**→ **Cache Management**. Clear the store cache.

### Step 5: Re-login

- Logout and log back into Magento Admin Panel.

## Step 6: Use Extension

- Go to **System** → **Configuration**. In the left column you will see the new tab called Biztech Extensions. You will find “Delivery Date” under Biztech extensions tab.

## Extension Activation

### Get activation key

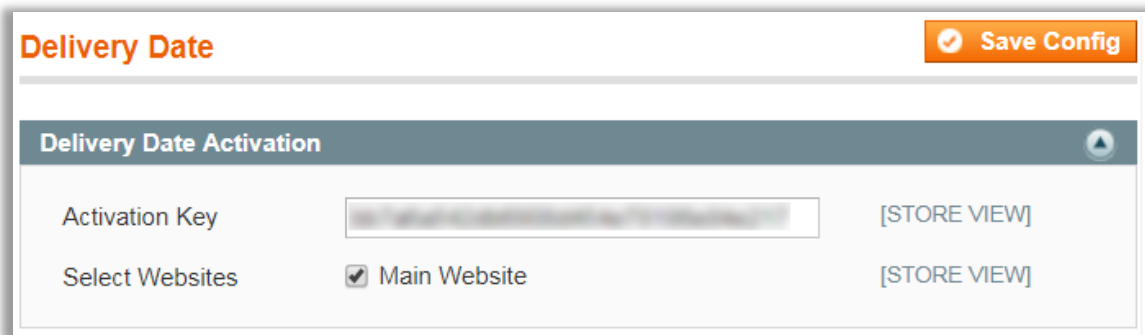

- Get the activation key from the Order Confirmation Mail. OR
- Login to your AppJetty account then go to Downloadable options and copy the activation key for the Delivery Date Scheduler extension.

### Activate your extensions

- Log into Magento Admin Panel and go to **System** → **Configuration** → **Biztech Extensions / Delivery date Activation** and enter the activation key in the "Activation Key" field for the **Delivery Date Scheduler** extension then click the “Save Config”.

### Select Websites

- When you enter and save the key it will be verified on our server and you can select the websites where you need to use the **Delivery Date Scheduler** extension. Click the "Save Config" button after making your selections.

- After successful license validation, you can select the website. Now, your **Delivery Date Scheduler extension** is activated.

## How it Works?

### Back End Configuration

- Please follow the below steps to enable Delivery Date Scheduler.
- Go to **System -> Configuration**. In the left column you will see the tab **Biztech Extensions -> Delivery Date**.
  - **Enabled to Admin:** Select **'Yes'** to let admin select the delivery date.
  - **Enabled For Checkout With Multiple Address:** You can enable this feature for checkout with multiple address.
  - **Enabled:** Select **'Yes'** to enable the Delivery Date extension. The extension is disabled by default.

## FAQ

1. What versions is Delivery Date Scheduler compatible with?
  - a. The current Delivery Date Scheduler version is compatible with:  
  
Community Edition: 1.4.x.x, 1.5.x.x, 1.6.x.x, 1.7.x.x, 1.8.x.x, 1.9.x.x.
  
2. I want to enable extension in more than one domain. How can I do so?
  - a. We provide license key for two domains: one live and one for development/testing URL. If you are to use the extension on extra domains then kindly purchase license key for the same. You can review the license key information on all our product page under section: "I have one Magento Installation with"  
  
Please review @ <https://www.appjetty.com/magento-delivery-date-scheduler.htm>
  
3. I am not able to see delivery date on checkout page. Any Clue?
  - a. "There can be few possibilities for order delivery date not working on OneStepCheckout. Please make sure below things from your end, You have installed extension properly and is in your custom theme not default one. If you have installed extension in default theme please move extensions files/folders to custom one. You can also refer user guide for the same, please review @ [http://www.appjetty.com/fileuploader/filedownload/bcfiledownload/bcfile\\_id/7/](http://www.appjetty.com/fileuploader/filedownload/bcfiledownload/bcfile_id/7/)  
  
If you are not using Magento default checkout, and is any third-party checkout this will further need customization for the same.  
  
Please once try moving files to custom theme and let us know if all goes well.
  
4. There are two packages in the extension. 1.0 And 2.0 which one I am supposed to use?
  - a. In package there are 2 folders as 1.0 and 2.0. If your Magento version is <= 1.4 then you need to install from 1.0 folder and if it is >=1.5 then you need to install extension from 2.0 folder.
  
5. I want to translate Translate Delivery Date and Delivery Comments fields. How to do so?
  - a. "To translate any text in our extension to particular language, you need add that text and its translated text in that language's locale csv.  
  
If You need to edit text for French language, then follow below path for French language.  
  
/app/locale/fr\_FR/Biztech\_Deliverydate\_Pro.csv"

6. Want to show shipping arrival date and comment while placing an order from admin panel. Can you please help?

- a. Regarding while placing order you will need to add coding in below file after line no 88  
    \app\design\adminhtml\default\default\template\sales\order\create\shipping\method  
    \form.phtml

```
<?php      echo      $this->getLayout()->createBlock('deliverydate/deliverydate')-  
>setTemplate('deliverydate/date.phtml')->toHtml(); ?>
```

7. The calendar does not let one click on it

- a. It seems that one property for calendar is missing that needs to be added in below path of your project folder.

```
/js/calendar/calendar-win2k-1.css
```

Add calendar property as below

```
Z-index: 9999;
```

8. Provides ability to remove next day delivery from the calendar?

- a. If you want to disable delivery dates of today and tomorrow automatically on all selections,

Then in our configuration of "Minimum interval of days between the order and delivery date" you will need to set value as "2"

9. Does extension work for Multiple Address Checkout?

- a. Yes, extension does work for multiple address checkouts.

10. The "Shipping Arrival Date" shows N/A after order placement. What should I do?

- a. "Please make sure that extension is installed in your custom theme and not the default one. Also possibility of field entry missing at database level due to improper configuration. If you are new to Magento, then please purchase our installation service. We will make things right for you."

11. How to configure this extension?

- a. You can refer our user guide or watch the Front End and Back End videos for more assistance on configuration.

## Points to Note

- Admin can also set the delivery date for customer while placing an order from admin side.
- Mentioned below is the code you need to use for displaying shipping arrival date and comment while placing an order from admin panel.
