Introduction

Our Magento 2 zip code validation extension makes it easier for your customers to check the availability of products to particular addresses through the process of Magento 2 post code validation. Further, you can optimize your checkout process by giving your customers an idea about the delivery date and time of the orders with our zip code validator. This transparency helps in increasing your customers' trust and satisfaction. Features like customization of availability/unavailability messages, zip code check label and button text, and more make the shopping experience all the way more engaging. To take the ordering process one step further, you can pair it with Magento 2 Delivery Date Scheduler that lets your customers choose delivery date and time.

Benefits of AppJetty's Zip Code Validator

➤ **Easy to Install and Configure**

➤ **Shows Estimated Delivery Date & Time**

➤ **Custom Label and Button Text**

➤ **Add Rules for Zip code**

Add the rules to manage Zip codes by selecting the country with the state and estimated time for next delivery availability.

➤ **Multiple Date Formats**

➤ **Compatible with Delivery Date Scheduler**

Prerequisites

- Admin should have a Magento Account.
- Admin should have configured stores.

Installation

Installation Steps

Manual Installation (Installing Magento 2 extension by copying code)

Step 1:

For Windows OS:

- Go to <your Magento install dir>/app/code. Under that, create the folders using following hierarchy:
- Biztech
- Zip Code Validator

For Linux OS:

- Enter the following commands while keeping their order:
 - `cd <your Magento install dir>/app/code`
 - `mkdir -p Biztech/ Zip Code Validator`
- After this, find the Downloaded Zip and extract all files and folders in the folder you just created Biztech/ Zip Code Validator.

Step 2:

- After the successful installation, you have to run the command on Magento 2 root directory-“php bin/magento setup:upgrade”.
- If you see blank page or permission error, go to Terminal (Linux)/Command Prompt(Windows).
 - `cd [magento root directory][var]`
 - run the following command
 - `$ chmod -R 777 *`

Step 3:

- After running the command, log into the admin panel and clear the Cache. Go to **SYSTEM** → **Tools (section)** → **CACHE MANAGEMENT**.

<input type="checkbox"/>	Cache Type	Description	Tags	Status
<input type="checkbox"/>	Configuration	Various XML configurations that were collected across modules and merged	CONFIG	DISABLED
<input type="checkbox"/>	Layouts	Layout building instructions	LAYOUT_GENERAL_CACHE_TAG	DISABLED
<input type="checkbox"/>	Blocks HTML output	Page blocks HTML	BLOCK_HTML	DISABLED
<input type="checkbox"/>	Collections Data	Collection data files	COLLECTION_DATA	DISABLED
<input type="checkbox"/>	Reflection Data	API interfaces reflection data	REFLECTION	DISABLED
<input type="checkbox"/>	Database DDL operations	Results of DDL queries, such as describing tables or indexes	DB_DDL	DISABLED
<input type="checkbox"/>	EAV types and attributes	Entity types declaration cache	EAV	DISABLED
<input type="checkbox"/>	Customer Notification	Customer Notification	CUSTOMER_NOTIFICATION	DISABLED

Step 4:

- After successful installation, you can see the 'Zipcode Validator' under **APPJETTY** tab inside **STORES** → **CONFIGURATION**.

Configuration

Scope: Default Config ?

APPJETTY ^

Delivery Date

Zipcode Validator ←

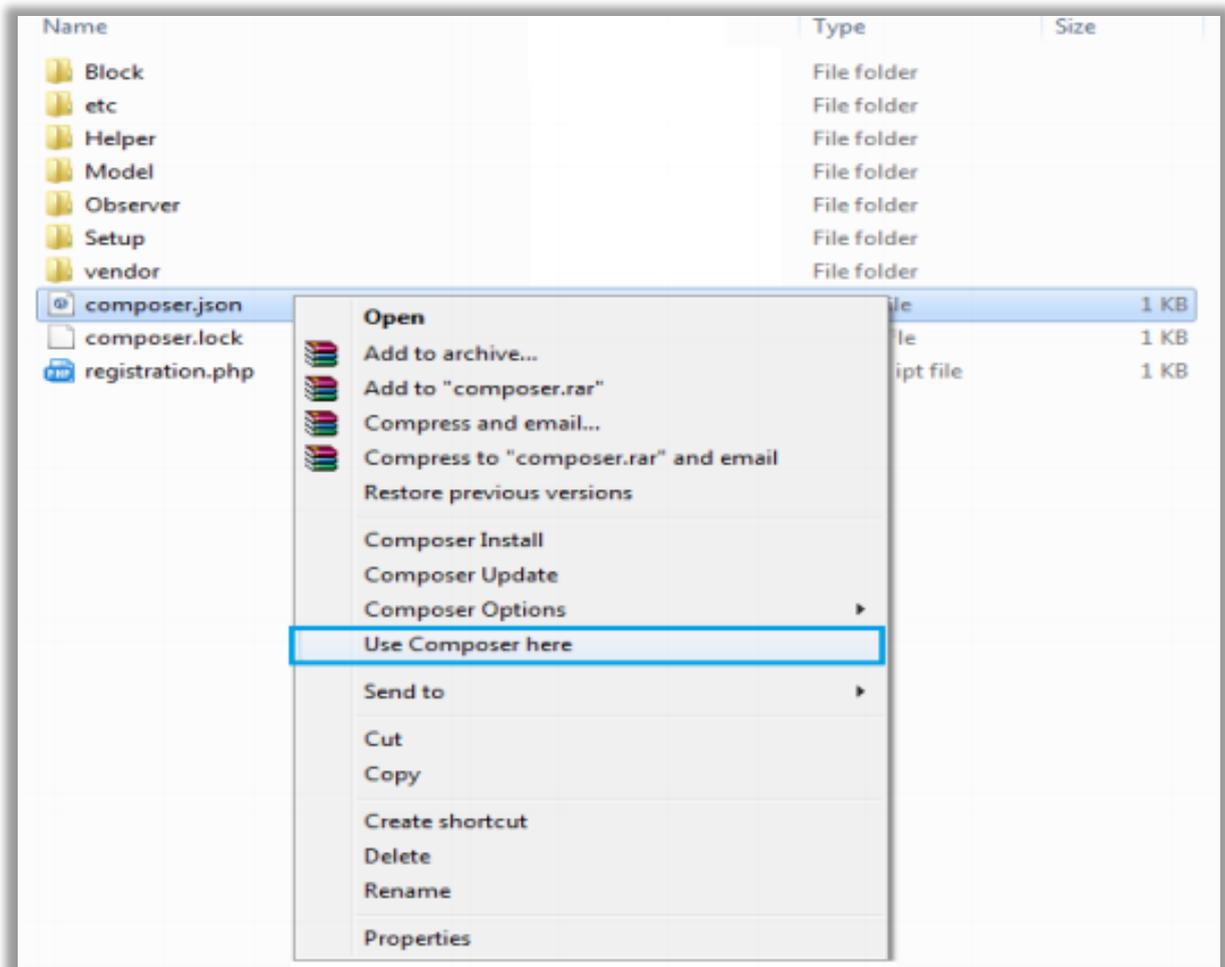

Installation via Composer

Step 1:

- Install composer from this link. If you have already installed composer, skip this step.

Step 2:

- Go to **app** → **code** → **Biztech** → **Zip code Validator**, then right click on composer.json and select Use Composer here.

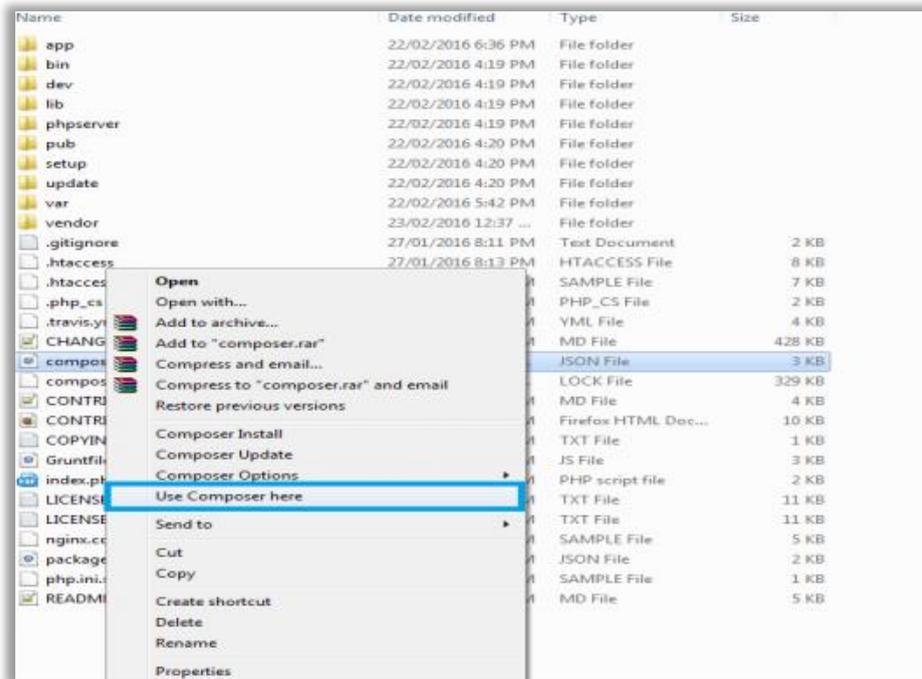

Step 3:

- After that, you can see command prompt where you have to run the following command:
 - composer update

Step 4:

- Perform the following command for installation of the module:
composer require biztech/zipvalidator

Step 5:

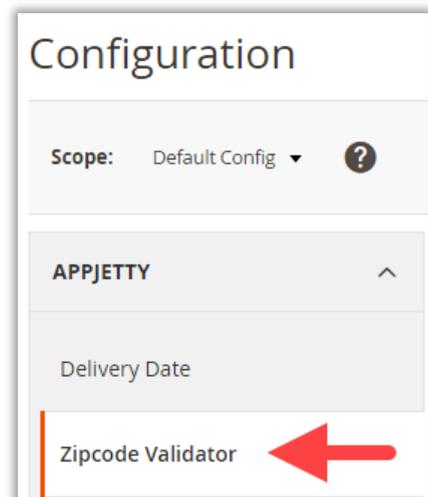

- You will see a cmd window and then run the following command there:
 - `php bin/magento setup:upgrade`

Step 6:

- After running the command, log into the admin panel and clear the Cache. Go to **SYSTEM** → **Tools (section)** → **CACHE MANAGEMENT**.

Step 7:

- After successful installation, you can see the “Zipcode Validator” under **APPJETTY** tab inside **STORES** → **CONFIGURATION**.

Step 8:

- In case you need to update our extension from a composer, you can use the below command. But before using that command you should have placed the latest Extension zip archive into the `/ABSOLUTE_PATH_TO_ZIP_Archive_FOLDER/composer update biztech/zipvalidator`.

Backend Configuration

- Please follow the steps below to configure Magento 2 Zip code Validator for your store.

Zip code Validator Activation

Get Activation Key

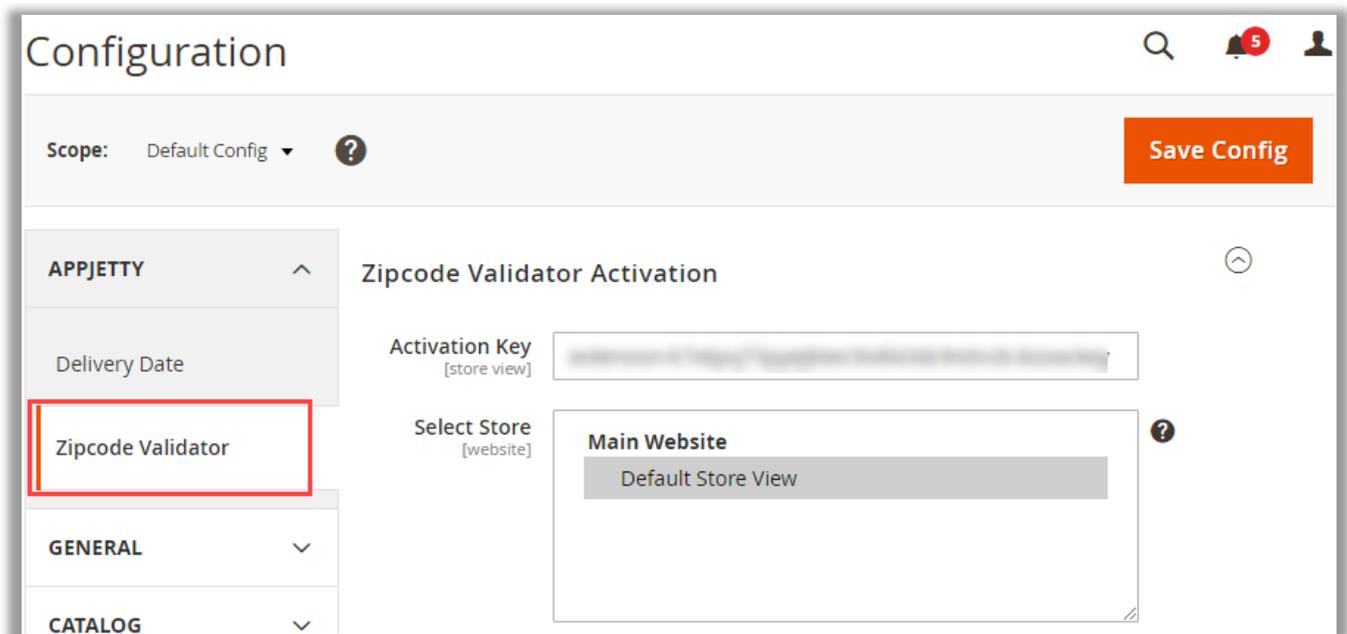

- Copy the activation key from the Order Confirmation Mail.

OR

- Log into your account at www.appjetty.com using your registered email and password you have provided at checkout process.
- Go to Downloadable Options and copy the activation key for the **Zip code Validator** extension.

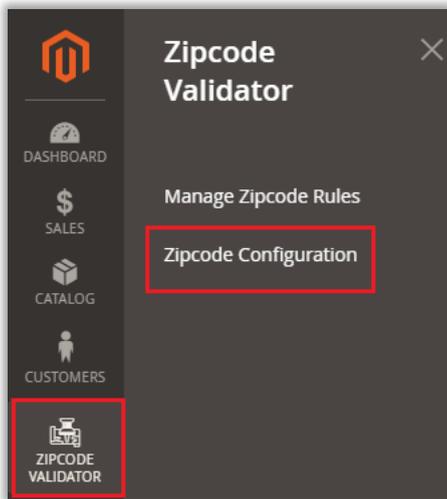

Insert Activation Key

- Log into Magento Admin Panel and navigate to **Zip code Validator** → **Zip code Configuration**. (**STORES** → **Configuration** → **APPJETTY**)
- Here you will find the **Zip code Validator Activation** option:
 - **Activation Key:** Enter the activation key for the “Zip code Validator” extension.
 - **Select Store:** Select the stores where you want to enable the Zip code validator. Then click on ‘**Save Config**’ button to save your configurations.

- Now, Zip code Validator extension got activated! After activation, you need to configure the **Zip code Validator** and **Manage Zip code Rules**.

Zip code Validator

- Navigate to **Zip code Validator** → **Zip code Configuration** to configure the Zip code and Delivery related options.

Zip code General Configurations

- After activation, navigate to the configuration option from **ZIP CODE VALIDATOR** → **Zip code Configuration**.
 - **Module Enable:** Select **Yes** to enable the Zip code Validator module.

General Configuration

Module Enable [store view] Yes Use system value

ZipCode Check Label Text [store view] Enter zipcode to check Use system value
Display message in zip code check textbox

ZipCode Check Button Label [store view] Check Use system value
Display text on zipcode check button

Delivery Unavailability Message [store view] We are not delivering in this area currently. Use system value
Add message that is to be shown in case of delivery unavailability at a particular zip code

Delivery Availability Message [store view] We are delivering this product in this area. Use system value
Add message that is to be shown in case of delivery availability at a particular zip code

Enable Estimated Date [store view] No Use system value

- **Zip code Check Label Text:** Insert a message to display in the Zip code check text box.
- **Zip code Check Button Text:** Insert a Button Label for Zip code check button.
- **Delivery Unavailability Message:** Insert the message that will be displayed if you *are not* delivering to that particular zip code.
- **Delivery Availability Message:** Insert the message that will be displayed if you *are* delivering to that particular zip code.

- **Enable Estimated Date:** By enabling this option, you can display the next available date for delivery with a proper message.

Once you've enabled the **Estimated Date** option, add the details for the below options:

- **Date Format:** Select the date format from the list to display for next delivery availability. If you select the Custom Date Format, you need to insert the a php date format.
- **Custom Date Format:** Insert the date in Php date format or select the Use system value.
- **Delivery Estimated Message (In case of single day/date):** Insert the message with estimated time. You can select starting date or day to display the delivery estimated message.

Note: Here you must use the right variables. If you want to display with a specific date, insert `{{start_date}}` but if you want to display with a specific day, insert `{{start_day}}`.

Enable Estimated Date <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Date Format <small>[store view]</small>	Custom Date Format	
Custom Date Format <small>[store view]</small>	d-m-Y	<input checked="" type="checkbox"/> Use system value
<small>Add A php date format which you would like to use to display date format</small>		
Delivery Estimated Message (In case of single day/date) <small>[store view]</small>	Estimated delivery time is <code>{{start_day}}</code> days	<input checked="" type="checkbox"/> Use system value
<small>Configure the estimated delivery time message to be shown to the customers in case you have mentioned estimated time in single day. Example: Message like this "Delivery is available within <code>{{start_day}}</code> days" will be displayed like this "Delivery is available within 3 days" These variables can be used in the message: <code>{{start_date}}</code> <code>{{start_day}}</code></small>		
Delivery Estimated Message (In case of range of days/dates) <small>[store view]</small>	Estimated delivery time is between <code>{{start_day}}</code> to <code>{{end_</code>	<input checked="" type="checkbox"/> Use system value
<small>Configure the estimated delivery time message to be shown to the customers in case you have mentioned estimated time in range of days. Example: Message like this "Delivery is available between <code>{{start_day}}</code> to <code>{{end_day}}</code> days " will be displayed like this "Delivery is available within 3 to 4 days" These variables can be used in the message: <code>{{start_date}}</code> <code>{{start_day}}</code> <code>{{end_date}}</code> <code>{{end_day}}</code></small>		

- **Delivery Estimated Message (In case of range of days/dates):** Insert the message with estimated time in range of days or dates. You can select either date or day to display the delivery estimated message.

Note: Here you must use the right variables. If you want to display with a specific range of dates range, insert `{{start_date}}` to `{{end_date}}` but if you want to display with a specific range of days, insert `{{start_day}}` `{{end_day}}`.

- After configuring and inserting required details, click on **Save Config** button.
- After saving the **Zip code Validator** options, you need to manage the Zip code Rules for specific country with its state and estimated time to display the next available delivery.

Manage Rules

- Navigate to **Zip code Validator** → **Mange Zip code Rules** to manage and configure Zip code options to restrict the orders temporarily and display the next available delivery in a specific area as per the inserted zip code details.
- You will get the list of existing 'Zip code Rules' in grid view. You can edit any by selecting **Edit** option from the 'Action' column.
- You can add new Zip code Rules by clicking on **Add New Zip code** button.

The screenshot shows the 'Zipcode Validator' interface. At the top right, there is a search icon, a notification bell with '5', and a user profile icon. Below this is a search bar with the placeholder 'Search by keyword' and a search icon. To the right of the search bar are buttons for 'Filters', 'Default View', and 'Columns'. Below the search bar is an 'Actions' dropdown menu and the text '3 records found'. To the right of this is a pagination control showing '20 per page' and '1 of 1'. The main content is a table with the following columns: ID, Zipcode Type, Zipcode, Estimated Time, Store View, Status, Created, Region, City, Area, Country, Modified, and Action. There are three rows of data.

ID	Zipcode Type	Zipcode	Estimated Time	Store View	Status	Created	Region	City	Area	Country	Modified	Action
1	Zipcode	380015		All Store Views	Yes	Jun 25, 2020 12:24:37 PM	Gujarat	Ahmedabad		India	Jun 29, 2020 9:57:26 AM	Select
2	Zipcode Range	380020 - 380050	4-5	All Store Views	Yes	Jun 25, 2020 12:34:02 PM	Gujarat	Ahmedabad		India	Jun 25, 2020 12:34:02 PM	Select
3	Zipcode	5000	4	All Store Views	Yes	Jun 26, 2020 6:35:47 AM	Gujarat	ahemdabad	prahaladnagar	India	Jun 30, 2020 7:11:03 AM	Select

- By clicking on that button, you will be navigated to **Add New Zip code** page to insert the details.

The screenshot shows the 'Add New Zipcode' form. At the top right, there is a search icon, a notification bell with '5', and a user profile icon. Below this is a 'Back' button and a 'Save' button. The form contains the following fields: 'Enable Zipcode Rule' (a toggle switch set to 'Yes'), 'Store View' (a dropdown menu with options: All Store Views, Main Website, Main Website Store, Default Store View), 'Estimated Time' (a text input field), 'Country' (a dropdown menu with '--Please Select--'), 'State/Province' (a text input field), 'City' (a text input field), 'Area' (a text input field), 'Zipcode Type' (a dropdown menu with 'Zipcode'), and 'Zipcode' (a text input field). There is a note below the 'Zipcode Type' dropdown: 'Recommended to use Zipcode Range option to enter less zipcodes'.

USER MANUAL: Magento2 Zip code Validator

- Insert the required details:
 - **Enable Zip code Rule:** Enable/Disable Zip code as per requirement.
 - **Store View:** Select the required store.
 - **Estimated Time:** Insert the estimated time for next delivery availability for that particular zip code.
Note: If you want to insert the range in Estimated Time, use a hyphen (-). **Ex:** If you want to display the message like “Delivery will be available between 3 to 4 days”, insert **3-4** in the text field.
 - **Country:** Select the Country from the list.
 - **State/Province:** Based on the Country, you will get the list of the states or provinces, then select the required State.
 - **City:** Insert City Name.
 - **Area:** Insert the area of the city.
 - **Zip code Type:** For a specific Zip code, select the option ‘Zip Code’ and for Zip code range choose the option ‘Zipcode Range’.
- **Zip code Range:** You can insert zip code range in case multiple zip codes are to be inserted and they are in series.
- Under the Zip code Range, insert starting and ending Zip codes.

City

Area

Zipcode Type

Recommended to use Zipcode Range option to enter less zipcodes

Zipcode Range

Zipcode Start *

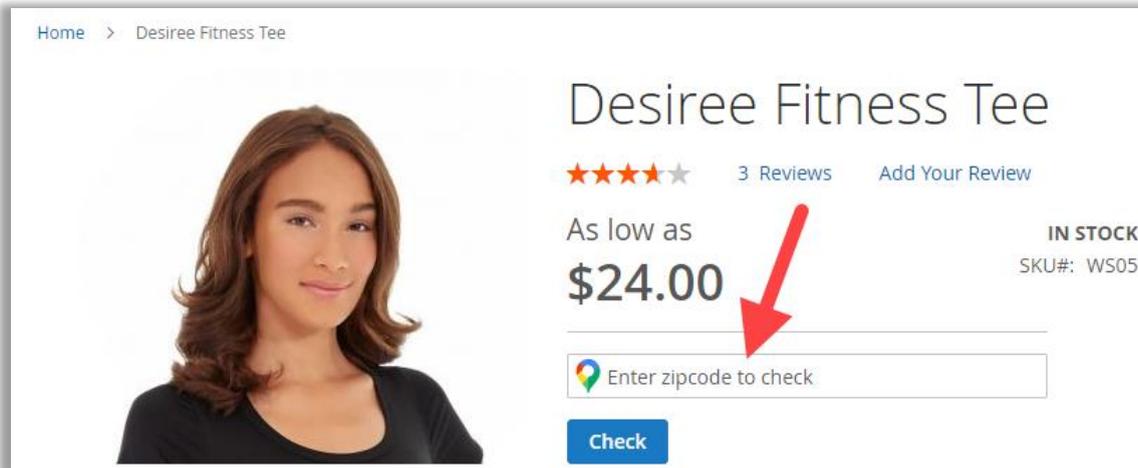

Zipcode End *

- After configuring the rules for the Zip code, click on **Save** button.

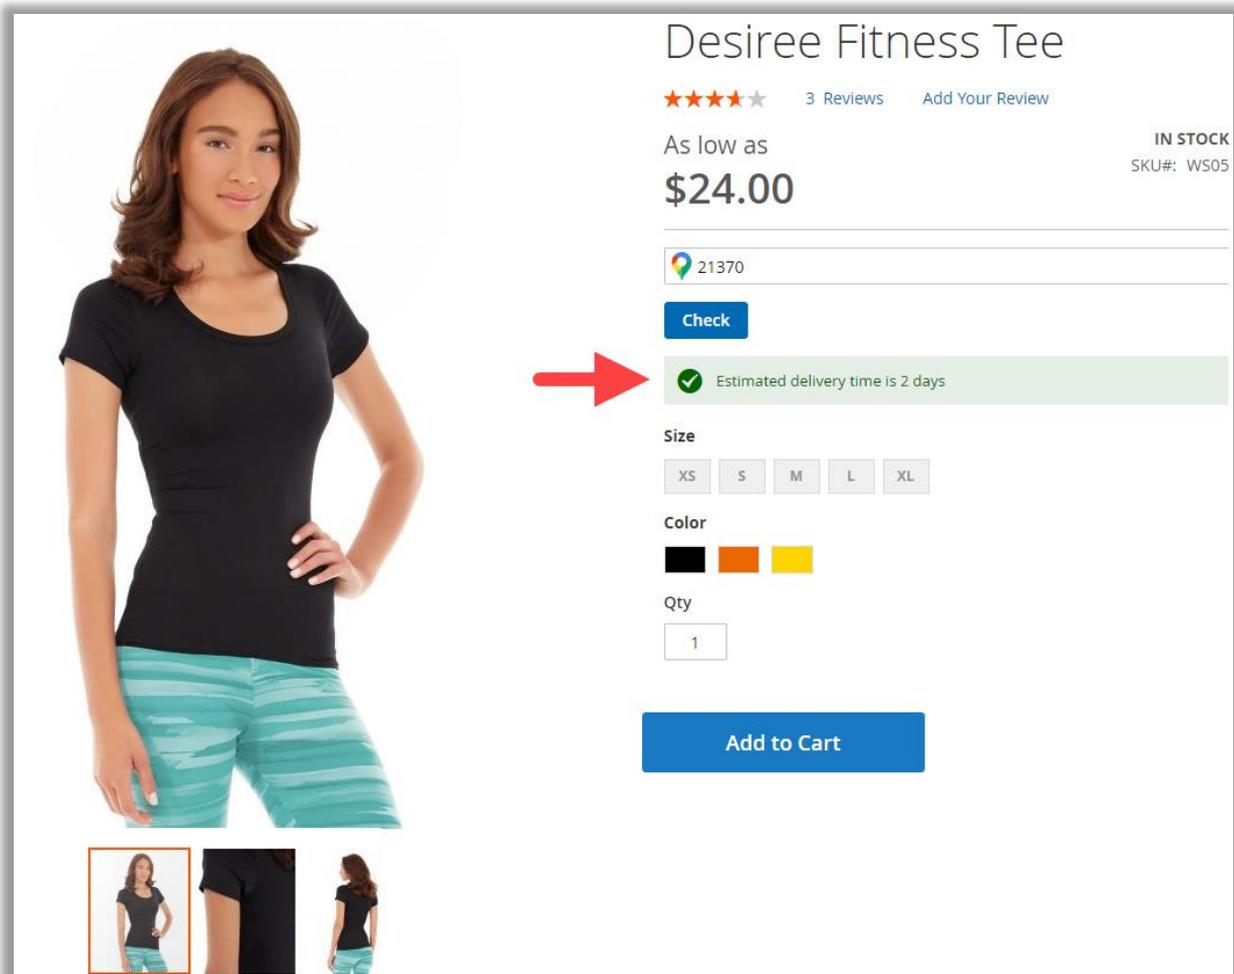

Note: The customer will get the ‘next delivery availability’ related message as per the inserted zip code in the Zip code Rules.

Frontend view

- Now, as per the Zip code Configurations and Zip code rules, the product availability will be displayed.
- When your customers will visit the webpage and navigate to product details page by clicking on that specific product, they will be able to see the Zip code text box option to check the availability of the Product in their specific area. Insert the Zip code and click on **Check** button.

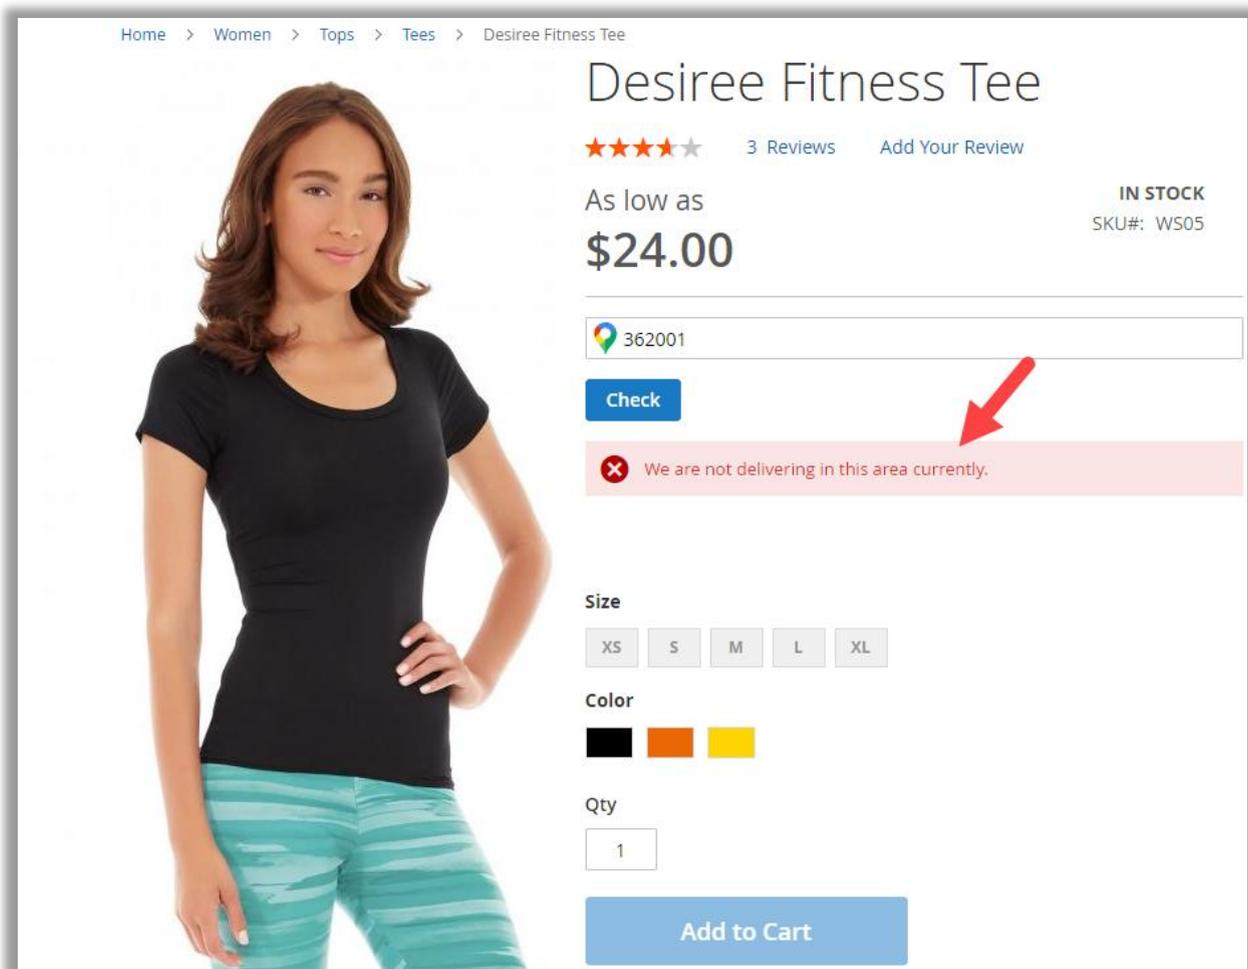

- Once your customer clicks on **Check** button after entering their zip code, they will get the next availability of delivery information and then they can Add the product into cart.

USER MANUAL: Magento2 Zip code Validator

- If the customer inserts the Zip code which is not configured in the Manage Zip code Rules, they will get the not delivering in this area message and the Deliver Date Information option is also disabled.

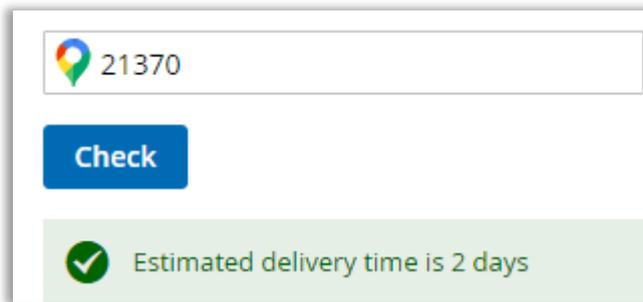

- The customer will not be able to add the product to cart until the Zip code is managed for that area.

Zip code custom messages

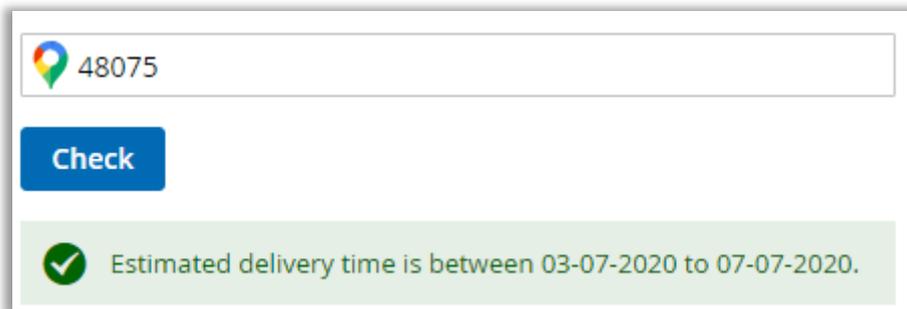

- Your customer will get the messages of the estimated time of delivery with specific day/date or days/dates range as per the Zip code configuration.

Delivery Estimated Message (In case of single day/date) <small>[store view]</small>	Estimated delivery time is {{start_day}} days	<input checked="" type="checkbox"/> Use system value
	Configure the estimated delivery time message to be shown to the customers in case you have mentioned estimated time in single day. Example: Message like this "Delivery is available within {{start_day}} days" will be displayed like this "Delivery is available within 3 days" These variables can be used in the message: {{start_date}} {{start_day}}	
Delivery Estimated Message (In case of range of days/dates) <small>[store view]</small>	Estimated delivery time is between {{start_day}} to {{end_	<input checked="" type="checkbox"/> Use system value
	Configure the estimated delivery time message to be shown to the customers in case you have mentioned estimated time in range of days. Example: Message like this "Delivery is available between {{start_day}} to {{end_day}} days " will be displayed like this "Delivery is available within 3 to 4 days" These variables can be used in the message: {{start_date}} {{start_day}} {{end_date}} {{end_day}}	

Specific day/date:

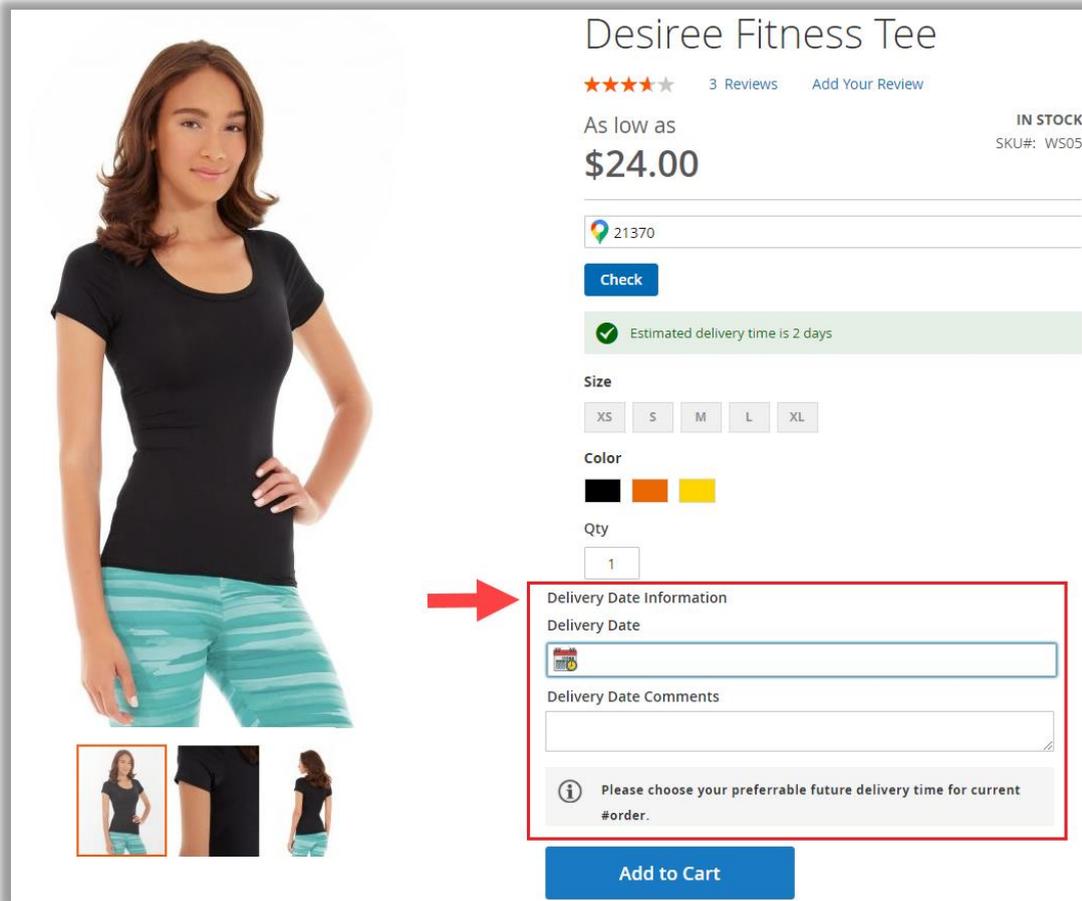

Day/date range:

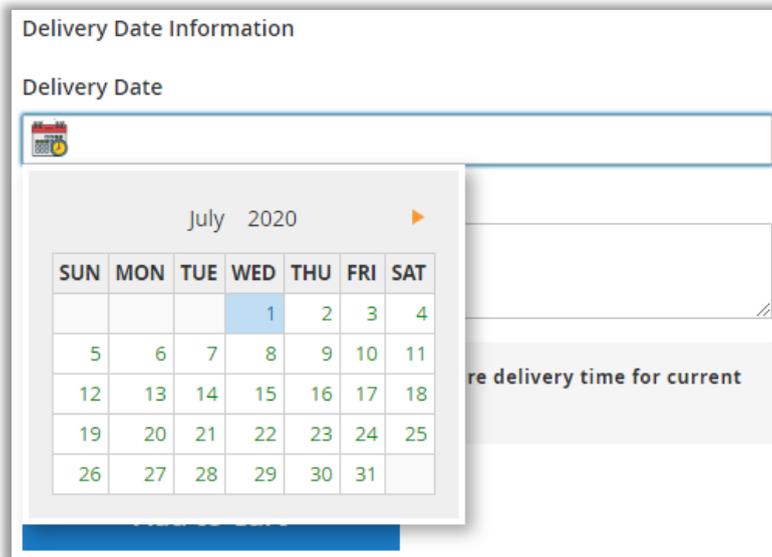

Note: The Date range will appear as per the Estimated delivery time calculation.

Compatible with DDS

- As the **AppJetty's** Zip code Validator extension is compatible with Delivery Date Scheduler, your customer will also get the option to choose the delivery date under the Deliver Date Information.

- After selecting the Delivery Date from the date picker option, your customer can insert the Comments and Add to Cart the product.

Points to Note

- The Zip code Validator is compatible with AppJetty M2 Delivery Date Scheduler.
- Your customer will get the Deliver date selection option only if the inserted zip is already in the Manage Zip Rules and you have active extension of Delivery Date Scheduler.
- You can modify the messages of Delivery Estimated with single day/date or with day/date range.
