Introduction

The Advance Mega Menu app provides the feature of Mega Menu. It implies that we can define a simple menu as a mega menu in which we can show multiple categories in a single menu. For the website's frontend, we have made a mega menu which obtains the category details from back-end and displays it as described in the mega menu configurations. (i.e., 2 columns menu, 3 columns menu or, 4 columns menu, background color or image, main menu icon, product slider, slider position and footer for mega menu).

Advance Mega Menu app also allows admin to opt from Category Mega Menu, Pages Mega Menu and List Category Mega Menu.

Benefits of Advance Mega Menu

- Easy customization of Mega Menu.
- Easy & effective management of Product Display.
- Admin can rename the category list as per the requirement.
- Admin can select number of columns for menu drop down.
- Admin can set images for highly recommended products and relevant categories.
- Admin can set icons, background color, etc. for menus.
- Admin can create multiple categories and their sub categories as well.
- Get different types of Mega Menus including, Category Mega Menu, List Category Mega Menu and Pages Mega Menu.

Prerequisites

Following points must be followed before starting the plug-in installation:

- One should login as an Admin in Odoo.
- Check that your Odoo Instance is compatible with Advance Mega Menu.
- An e-commerce module should be present in your instance to use this app.

Note: Website Mega Menu v10's, v11's and v12's all new features are not available in v8, v9.

Installation

Installation Steps

Step 1: Download and extract the Zip File.

Step 2: Check your Odoo add-ons path.

- It should be same as defined in Odoo Config file.
- Config files are mostly saved in /etc folder. For e.g. /etc/odoo.conf
- Open Config file:
 - Give the command: `sudo/etc/odoo.conf`
 - Config file content: `addons_path = /opt/odoo/addons`

Step 3: Open Terminal and go to the download location

- For e.g. if the download location path is: /home/odoo/Downloads then the command to be written in the terminal would be: `cd/home/odoo/Downloads`

Step 4: Copy download modules to add-ons path

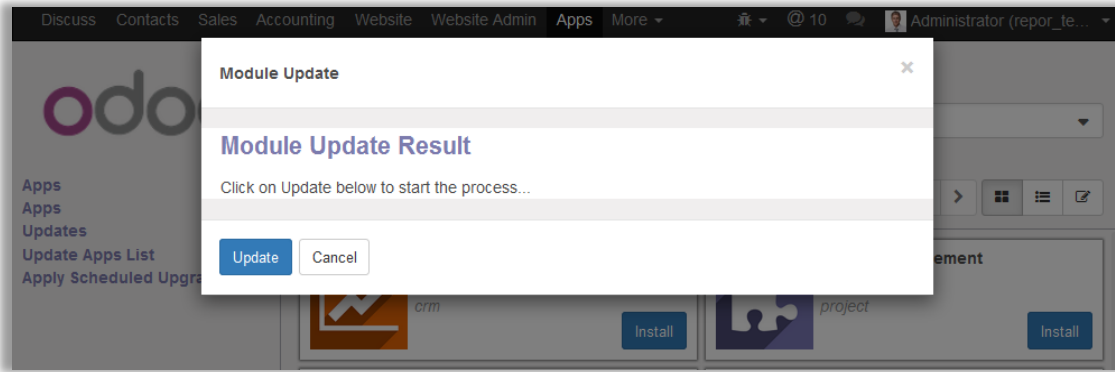

- Give the commands mentioned below to perform copy operation:
 - `$cd /home/odoo/Downloads/biztech_website_megamenu`
 - `$cd v8`
 - `$sudo cp biztech_website_megamenu /opt/odoo/addons`

Step 5: Restart the Odoo server

Step 6: Login with the admin credentials in your Odoo instance.

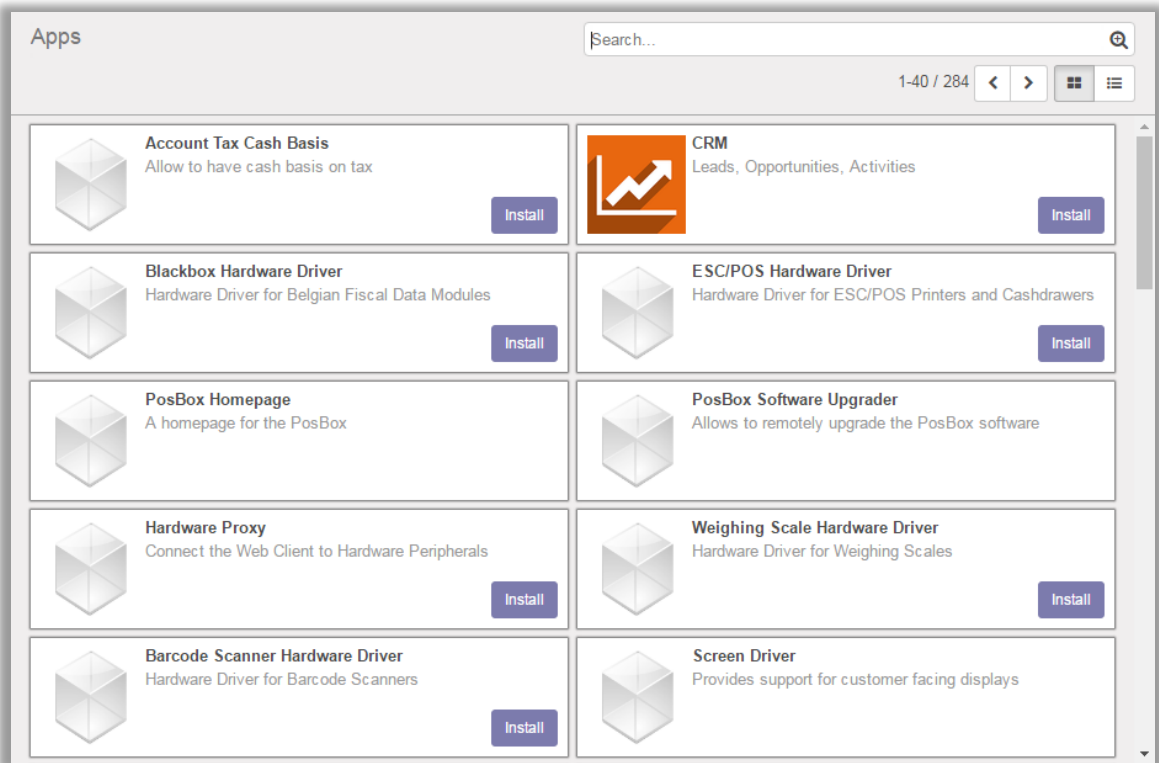

Step 7: Go to Settings/Update Module List.

- Click on 'Update' button.

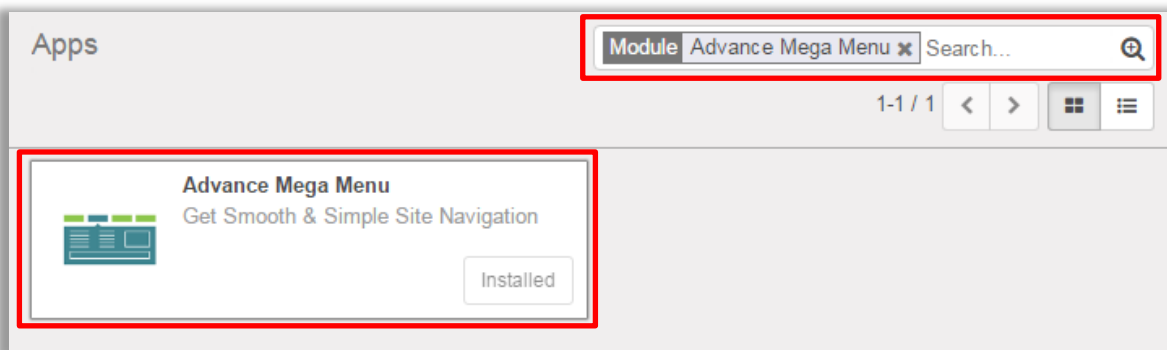

Step 8: Go to Settings/Local Modules

- Remove search filter

- Enter module name in the search box provided in the top right corner of the page. For e.g. Here write Advance Mega Menu. Click on 'Install' button.

App Configuration

Creating Mega Menu

- Go to **Website Admin -> Settings -> Configuration -> Pages**. Choose the page and navigate to Edit view of that particular page.
- Now navigate to **'Related Menu Items'** section and click on **'Add an item'** button to create a new menu.
- There you will have options to add Web Site, Menu Name, URL for Menu, Option to open menu in new window, Parent Menu & If the new menu is mega menu or not.

The screenshot shows a dialog box titled "Create Related Menus" with a close button (X) in the top right corner. The dialog contains several form fields and checkboxes:

- Website:** A dropdown menu with "Website localhost" selected and a share icon to its right.
- Menu:** A dropdown menu with "Appliances" selected and highlighted in blue.
- Url:** A text input field containing "/appliances".
- New Window:** A checkbox that is currently unchecked.
- Parent Menu:** A dropdown menu with "Home" selected and a share icon to its right.
- Is megamenu...?:** A checkbox that is currently unchecked.

At the bottom of the dialog, there are three buttons: "Save & Close" (dark blue), "Save & New" (medium blue), and "Discard" (white with a grey border). A horizontal scrollbar is visible above the buttons.

Mega Menu Configuration

- Select **Is Mega Menu...?** Option to create mega menu & set configurations as required.
 - **Mega Menu Type:** Choose the number of columns needed in Mega Menu.

Mega Menu Categories & Sub Categories

- Go to **Website Admin -> Configurations -> Products -> eCommerce**. Now click on **'Create'** button to create a Product Category.
 - To create a main category, give name of category, click on Include in Mega Menu Option to include it in mega menu, set main menu as the menu in which you want to create category. You can also give sequence No. for deciding sequence in Mega Menu list.

The screenshot shows a web form titled "eCommerce Categories / New". At the top left, there are two buttons: "Save" (highlighted in blue) and "Discard". Below the buttons is a large, light gray rectangular area containing a form. On the left side of this area is a square icon with a camera and a diagonal slash through it. The form fields are as follows:

- Name:** A text input field containing "Kitchen Appliances".
- Parent Category:** A dropdown menu that is currently empty.
- Sequence:** A text input field containing the number "1".
- Include in mega menu:** A checkbox that is checked.
- Main menu:** A dropdown menu containing "Electronics", with a small square icon to its right.
- Description:** A text area containing the text "It will contain all the kitchen appliances."

- **To create Sub Category:** Enter name of category and choose category name in which you want to create sub category. You can also give sequence no. for deciding the sequence in category List.

eCommerce Categories / New
